

FACTSHEET

Performance Returns

The AlphaQuest UCITS Fund returned -0.69% in April (USD Institutional Founder Share Class).

Investment Objective & Strategy

The AlphaQuest UCITS Fund's investment objective is to seek capital appreciation over the long term.

The AlphaQuest UCITS Fund invests, on a long and/or short basis, in a globally diversified futures portfolio representing the major asset classes of equities, fixed income and currencies. The AlphaQuest UCITS Fund also gains exposure to commodities, on a long and/or short basis, through the use of structured financial instruments ("SFIs"). The AlphaQuest UCITS Fund targets, over the medium term, a realized volatility in the range of 10%-12%, in order to adhere to the UCITS investment restrictions.

Quest employs a systematic trading program (the "Program"), diversified by asset class and with individual positions intended to provide a return over different time horizons, that seeks to deliver positive alpha (alpha is a statistical measurement used to determine the risk-reward profile of a potential investment). The Program is composed of a number of trading systems, each of which generates individual trades. These trading systems generate trades on the basis of price movement indicators which seek to identify situations where there is potential for an increase in the price volatility of a given market. Risk controls are integrated into the Program to measure the potential risk associated with trades generated by the Program. Generally, the Program will determine that AlphaQuest UCITS Fund should take a long position in a market that has shown an upward trending price or a short position in a market that has shown a downward trending price.

Monthly Commentary

Global markets showed some nervousness in the early part of the month with tension building in the Korean peninsula and ahead of the first round of the French Presidential election. However, the success of Emmanuel Macron in France and a strong run of corporate earnings boosted sentiment in the second half of the month, pushing risk assets to new record highs in some cases. Economic data releases indicated further improvement in growth with incipient inflation pressures.

Volatility across global markets remained low both on a realized and implied basis. The rolling 40-day realized volatility on the S&P 500 was unchanged at 7.1%, while the 1-year realized volatility on the index fell to a 10-year low of 9.9%. The VIX Index of implied volatility on the S&P 500 closed at 11.0% after falling to a 3-year low earlier in the month.

The gains generated in the equity markets, initially short and then long in the later part of the month. Gains were also generated in Agricultural markets and from the rally in global Government Bond markets. These gains were offset by losses in Energy, particularly in Crude Oil and in Metals, both precious and industrial.

Overall, the program has adjusted to the lower volatility environment. We believe the opportunities going forward remain very strong, especially given current levels of volatility and the skew of many asset classes remaining negative, indicating the possibility of strong volatility expansion potential.

USD Institutional Founder Share Class UCITS Performance

	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sept	Oct	Nov	Dec	Y-T-D
2017	-4.33%	-2.70%	-0.99%	-0.69%									-8.47%

THE MANAGER

Nigol Koulajian

Founder and Chief Investment Officer

Nigol has been designing and trading short and long-term technical systems for over 24 years. Mr. Koulajian began his career with Andersen Consulting and then moved to Deutsche Bank, where he helped create and computerize a risk management system that became a widely used tool for senior management. He then became the Head Trader for Carmel Capital and while working at Carmel

designed and priced hedges on international equity and fixed income arbitrage positions. In 1996, Mr. Koulajian joined Weston Capital Management, LLC where he was the Director of Asset Allocation and Product Development, responsible for the allocation of assets to equity hedge funds and CTAs. In 1998, Mr. Koulajian started Avalon Asset Management, LLC, a fund of funds, and in 1999, he co-founded a CTA, Enterprise Asset Management, LLC. Mr. Koulajian earned an MBA in finance from Columbia Business School and a BS in electrical engineering from Notre Dame.

Paul Czkwianianc

Head of Research

Paul joined the firm at its inception in 2001. Mr. Czkwianianc started his career in the financial industry in 1999 at Enterprise Asset Management where he worked alongside Mr. Nigol Koulajian. Mr. Czkwianianc holds a B.S. degree in Applied Mathematics from Columbia University and an M.S. degree in Mathematics from New York University.
