

KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Angel Oak Multi-Strategy Income UCITS Fund a Sub-Fund of MontLake UCITS Platform ICAV, managed by MLC Management Limited SEK Retail Class Accumulating Shares (IE00BDB10132)

Objectives and Investment Policy

The investment objective of the Sub-Fund is to generate income whilst maintaining an overriding focus on capital preservation.

The Sub-Fund will invest in a diversified portfolio of asset-backed securities ("ABS"), which are securities whose value and income payments are derived from a pool of underlying assets, such as bank loans, mortgages, corporate bonds, credit card debt and other receivables. The returns from ABS derive from the interest and capital repayments on the pool of assets backing the security, and ABS may themselves be divided into separate classes of security with different rights to the returns and priority of claims over the underlying pools. Accordingly, the level and timing of returns on different tranches of ABS will vary, and the Sub-Fund will look to invest in ABS which are undervalued according to the Sub-Investment Manager's analysis of the relative values of ABS in issue in its chosen universe.

The Sub-Fund may invest in ABS issued by government, government agency and corporate issuers, and may include high-yield debt securities (also known as "junk bonds") and securities that are not rated by any rating agencies. There are no geographical limitations on where the assets underlying the ABS the Sub-Fund may invest in, other than for mortgage-backed securities which will be based on mortgages principally issued in the United States. Issuers will be mainly based in the United States, but the Sub-Fund may acquire ABS which represent exposure to the European or Asian markets from time to time.

The Sub-Fund may use derivatives not only for hedging purposes but also to achieve its investment objective. Derivatives used may include exchange and over the counter traded derivatives, including futures,

options, credit default swaps, interest rate swaps, forward foreign exchange contracts and total return swaps. For a full list of derivatives that may be used by the Sub-Fund please refer to the supplement for the Sub-Fund.

The Sub-Fund is appropriate for investors with a long-term investment horizon.

Your shares do not pay you income, but instead the Sub-Fund reinvests such income to grow your capital.

You may sell your shares on any day that banks are open in Ireland and the United States. You must submit your application to the Sub-Fund's Administrator before 1.00 p.m. on the business day on which you want to sell.

As your shares are denominated in Swedish Kronor and the Sub-Fund is in US Dollars, forward currency exchange contracts are used to attempt to eliminate the effects of changes in the currency exchange rates against the US Dollar.

Risk and Reward Profile

The Sub-Fund is in category 3 as it invests in securities that can vary significantly in price from day to day due to a variety of factors. Therefore the chance to make large gains means the risk of suffering large losses.

The risk category for this fund is set at 3. It is calculated in line with EU regulations and is based on the risk limit for the fund.

Counterparty Risk: A counterparty may fail in paying proceeds of sale of assets to the Sub-Fund and/or may fail in delivering securities purchased by the Sub-Fund.

Leverage Risk: The Sub-Fund uses swaps to both reduce or "off-set" risk and for investment purposes. Swaps may be used to expose the Sub-Fund to the potential of a greater return (achieve/create leverage) but this entails a greater risk for your investment.

Liquidity Risk: The Sub-Fund may not be able to sell an investment at the time and price that is most beneficial to the Sub-Fund and may be unable to raise cash to meet redemption requests as a result.

Credit Risk: The Sub-Fund may invest in fixed income derivatives or

money markets. The Sub-Fund is therefore exposed to the risk that the credit institution may become unable to meet its financial obligations or declare bankruptcy.

Repayment Risk: ABS are particularly associated with the risk of earlier than expected repayment of capital on the debt underlying them. This creates the risk that the Sub-Fund may have cash returned to it early and be unable to reinvest it at the same rate of return. Repayment may also take longer than expected as borrowers may have the ability to prolong a loan at existing rates in an increasing interest rate environment.

For a more detailed explanation of risks, please refer to the "Special Considerations and Risk Factors" section of the prospectus.

A **category 1** fund is not a risk-free investment - the risk of losing your money is small, but the chance of making gains is also limited. With a **category 7** fund, the risk of losing your money is high but there is also a chance of making higher gains. The seven-category scale is complex. For example, a category 2 fund is not twice as risky as a category 1 fund.

The category is based upon the annual calculation of the Sub-Fund's risk calculation relevant to the nature of the types of instruments the Sub-Fund invests in. The risk category shown is not guaranteed and may change over time.

Charges

The charges you pay are used to pay the costs of running the Sub-Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	Up to 5.00%
Exit charge	None
This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out	
Charges taken from the Sub-Fund over a year	
Ongoing charge	1.54%
Charges taken from the fund under certain specific conditions	
Performance fee	None

Any entry charge shown is a maximum figure. Where charges are shown in some cases you might pay less; you can find this out from your financial advisor or distributor.

The ongoing charge figure is based on an estimate of the charges. This figure may vary from year to year.

You can find out more details about the charges and how they are calculated by looking at the Sub-Fund's prospectus and supplement which are available at www.montlakeucits.com.

Past Performance

There is insufficient data to produce a useful indication of past performance for the Share Class.

The past performance takes account of all charges and costs.

The value of the Share Class is calculated in Swedish Kronor.

Past performance is not a reliable indicator of future results.

The Sub-Fund came into existence in 2015. This class launched on 11 July 2016.

Practical Information

About the Sub-Fund

The Sub-Fund's assets are held with its depositary, Northern Trust Fiduciary Services (Ireland) Limited.

Angel Oak Multi-Strategy Income UCITS Fund is a Sub-Fund of MontLake UCITS Platform ICAV. The assets of this Sub-Fund are segregated from other funds on MontLake UCITS Platform ICAV.
